

IMPACT & INNOVATION REPORT

Prepared by

JIJAU MAHILA BAHUUDDESHIYA SHIKSHAN SANSTHA

EXECUTIVE OVERVIEW

IMPACT & INNOVATION: REDEFINING RURAL EDUCATION FOR THE NEXT GENERATION

22 Years of Trust. One Bold Vision for the Future.

In rural Buldana, education for girls once stopped at Standard 7. Distance, safety concerns, and social barriers made further education difficult.

In 2003, Jijau Mahila Bahuuddeshiya Shikshan Sanstha changed this reality by creating a safe, local pathway for girls to continue their education.

For over two decades, the institution has ensured that no girl drops out due to access limitations. Today, it stands as a trusted, community-backed education hub, offering secondary and higher secondary education within the village itself.

This report brings together:

Impact

- 22 years of uninterrupted education and 100% retention

Innovation

- A scalable model where infrastructure creates long-term sustainability

With a **₹2.50 Crore** one-time investment, the focus is to strengthen and scale a proven system.

This is not just education. This is a long-term transformation.

THE 22-YEAR LEGACY (IMPACT)

First Movers. Lasting Change.

Since 2003, the Sanstha has been a first mover in rural girls' education in Buldana, addressing a gap where no local secondary education existed.

Solving the Right Problem at the Right Time Earlier:

- No access beyond Class 7
- Travel to towns was unsafe and impractical
- Girls dropped out early

The institution introduced:

- Local secondary education (Std. 8 to 10)
- Higher secondary (Arts and Science)

Proven Impact

- 100% retention of girls
- Dropout after Std. 7 eliminated
- 500+ beneficiaries and growing

Built on Trust

- Parents trust the system
- Girls continue their education locally
- Strong community ownership

THE PROBLEM STATEMENT

The 7th Standard Ceiling

The issue in rural Buldana was not interesting. It was access.

Distance as the Barrier

- No local secondary school
- Schools located in distant tehsil towns
- Travel unsafe and costly

Result:

- Education stopped after Standard 7
- Girls dropped out due to circumstances

Safety and Social Constraints

- Families are hesitant to send girls far
- Cultural and safety concerns
- Limited mobility

Why This Matters

The institution has already solved this gap. This project ensures it never returns by:

- Strengthening infrastructure
- Improving learning conditions
- Securing long-term continuity

This is not just solving a problem.

This is preventing it for generations.

THE EFFICIENT INNOVATION

Infrastructure Builds. Government Sustains.

The strength of this project lies in its high-efficiency Public-NGO Partnership model.

A Simple but Powerful Structure

- The NGO builds the Body
- Infrastructure, classrooms, labs, facilities
- The Government provides the Soul
- Salaries, academic delivery, and long-term operations

This model ensures:

- No recurring salary burden on donors
- Continuous functioning backed by government support
- Long-term sustainability after a one-time investment

Why This Model Works

- Teaching and non-teaching staff salaries are already covered by the Government of Maharashtra
- The institution is already functional and trusted
- Funding is focused only on strengthening infrastructure

The Result

- Low financial risk
- High operational stability
- Long-term impact without future dependency

One-time funding. Lifetime impact.

INFRA- STRUCTURE AS INNOVATION

Safe Campus. Strong Foundation.

Infrastructure in this project is not just construction. It is a safety and access solution for rural girls.

₹1.20 Crore Investment in Safety and Stability

Planned upgrades include:

- Building repair and structural strengthening
- Improved classrooms and learning spaces
- Better lighting, ventilation, and basic facilities
- Water, sanitation, and safety arrangements

Why This Matters

For rural families, **safety defines education decisions.**

A well-maintained campus ensures:

- Parents feel confident sending daughters to school
- Girls attend regularly without interruption
- Learning happens in a stable environment

Safe Campus Innovation

This is not just an infrastructure improvement.

It is the creation of a secure, reliable, and girl-friendly education space.

Better buildings lead to better retention.

STEM & PRACTICAL LEARNING

From Access to Aspiration

The next level of impact comes from the quality of education, not just access.

₹40 Lakh Investment in Laboratories

The project introduces:

- Science laboratories for practical learning
- Basic equipment aligned with the curriculum
- Facilities for hands-on education

Why This is a Breakthrough

In many rural areas:

- Science education remains theoretical
- Lack of labs limits subject choices
- Girls rarely opt for the science streams

What This Changes

- Enables Science stream education locally
- Builds confidence in technical subjects
- Opens pathways to higher education and careers

From Learning to Opportunity

This shift transforms education from basic schooling to future readiness.

Access gave them education.

STEM will give them an opportunity.

RESOURCE ALLOCATION

₹2.50 Crore. 100% Development. 0% Salaries.

This project stands out for its clear, disciplined, and transparent fund utilisation.

Where the Investment Goes

- Infrastructure Repair & Upgradation: ₹1.20 Cr
- Classrooms & Learning Spaces: ₹45 Lakh
- Laboratories & Academic Facilities: ₹40 Lakh
- Furniture & Teaching Aids: ₹20 Lakh
- Basic Amenities & Safety: ₹15 Lakh
- Planning, Monitoring & Contingency: ₹10 Lakh

Total Project Cost: ₹2.50 Crore

What Makes This Model Unique

- 0% spent on salaries
- The entire funding is used for long-term assets
- Payments linked to actual work completion

Teaching and non-teaching salaries are already covered by the Government of Maharashtra, ensuring that donor funds are used strictly for development.

Financial Clarity

- One-time investment
- No recurring donor dependency
- Strong financial controls and documentation

Every rupee builds a lasting asset.

THE SCALABILITY PLAN (2027- 2028)

From Strong Foundation to Wider Reach

With strengthened infrastructure, the institution is ready to scale its impact.

Growth Roadmap

- Current Reach: 500+ girls
- Target: 650+ beneficiaries in the next phase

Strategic Expansion Focus

- Increased enrollment from nearby villages
- Strengthening junior college offerings
- Enhancing Science stream participation

Beyond Infrastructure

The next phase introduces:

- Alumni engagement systems
- Scholarship support for higher education
- Community-driven retention programs

Sustainable Growth Model

- Same geographic cluster
- Proven operational system
- Scalable without major structural changes

From impact to expansion. From access to excellence.

IMPACT- MEASURABLE OUTCOMES

Clear Results. Long-Term Change.

This project delivers both immediate outcomes and deep social impact.

Direct Outcomes

- Safe and accessible education for rural girls
- Improved classrooms and infrastructure
- Better learning environment and facilities
- Strengthened Science and practical education

Long-Term Social Impact

- Increased completion of secondary and higher secondary education
- Delay in early marriage due to continued education
- Higher participation of women in economic activities
- Improved decision-making and confidence among girls

Community-Level Transformation

- Increased awareness about girls' education
- Stronger trust in local institutions
- Creation of role models for future generations

As highlighted in the DPR, education creates benefits beyond classrooms and strengthens the entire rural ecosystem. Educate a girl, and you transform a generation.

THE STRATEGIC PARTNERSHIP

Low Risk. High Impact. Long-Term Value.

This project offers a rare combination of stability, credibility, and scalability.

Why This is a Strong Investment

- 22 years of proven track record
- Fully functional and government-supported institution
- Salaries already covered
- Clear, one-time funding requirement

What Your Support Enables

- Safe and improved infrastructure
- Stronger academic facilities
- Long-term continuity of education for rural girls

A Partnership That Delivers

- Minimal financial risk
- High social return
- Immediate and measurable outcomes

The Opportunity

You are not funding a new idea.

You are strengthening a system that already works.

Join this initiative to secure the future of rural girls.

One investment. Lifelong impact.
